FATIH ES

fatihesdev@gmail.com | +90 531 480 2676 | linkedin.com/in/fatihes | github.com/fatihes1 | fatihes.com

Senior Software Developer with 4+ years of experience specializing in Cloud Architecture (AWS/GCP) and AI-driven systems. Expert in architecting D2C payment gateways and Serverless infrastructures for high-scale environments (100K+ CCU). Proven success in reducing infrastructure costs by 80% and augmenting user retention through data-driven engineering.

EXPERIENCES

Software Developer - Panteon Games

Dec 2024 - Present | Ankara, Turkey

- Conceptualized and scaled a **high-throughput leaderboard architecture** from scratch, designed to handle massive concurrent data streams with minimal latency for games with **100K+ concurrent players**.
- Pioneered **LLM-based image generation** via custom caching architectures; optimized API consumption costs while delivering high-fidelity dynamic game assets.
- Modernized existing mobile game control panels via **AWS Serverless** stack (Lambda, API Gateway, Athena) and **NestJS**, achieving a **30% reduction in latency** and **maintaining 99.95% uptime**.
- Orchestrated a serverless event-tracking platform on **GCP**, **reducing** infrastructure **costs by 80%** while enabling real-time analytics that boosted **player retention by 18%** and **purchases by 22%.**
- Automated customer support workflows by integrating a GPT-powered chatbot **handling 5K+ daily queries** with a **65% resolution rate**, **decreasing** manual **ticket load by 25%.**
- Architected a **Direct-to-Consumer (D2C)** payment infrastructure, **bypassing** standard **app store commissions** to maximize net profit margins while maintaining **100% transaction integrity**.

Software Developer - Moneo (Outsource Karaca)

Mar 2023 – Dec 2024 | Istanbul, Turkey

- Transformed Kommunity.com's legacy infrastructure into a modular **Node.js/React ecosystem**, implementing a **modular architecture** and rigorous **test coverage** that eliminated **25% of technical debt** and significantly improved system maintainability.
- Developed a high-performance admin ecosystem for Karaca using **Laravel/React**, reducing time-to-market for retail promotions and streamlining internal product management workflows.
- Refined frontend performance and **UI/UX flows across large-scale e-commerce platforms**, resulting in a **30% increase in average session duration** and a measurable uplift in conversion rates.
- Re-engineered core microservices infrastructure using **NestJS** and **Laravel**, achieving a **25% reduction in CPU** utilization and improving **API response times by 20%** to support high-traffic retail events.

Software Developer - Nette Interactive

Oct 2022 - Jan 2023 | Bursa, Turkey

- Architected automated **CI/CD pipelines for corporate web applications** using **Laravel**, achieving a **40% reduction in deployment time** and ensuring **zero-downtime releases**.
- Developed high-fidelity, responsive interfaces using **Vue.js** and **TailwindCSS**, resulting in a **25% increase** in **user engagement** and a **15% reduction** in bounce rates.
- Implemented and optimized client-facing web portals for international brands, including Dawood Timber and Chnoca Perfume, driving a **30% uplift in customer conversion** rates.

Software Developer Scholarship - TUBITAK

Oct 2021 - Feb 2022, Bursa, Turkey

- Constructed **core backend** modules for PyNar, a National Research Council-funded open-source project, by architecting **scalable backend modules** and developing robust **RESTful APIs** in **PHP**.
- Built accessible and intuitive frontends utilizing **Vue.js** and **Bootstrap 5**, ensuring seamless performance across diverse screen sizes and devices.

EDUCATION

Master of Science, Computer Engineering
Gazi University, Ankara, Turkey (Ongoing)

- Advanced research focused on **Multi-Agent Systems (MAS)**, **Machine Learning**, and **Deep Learning** for autonomous decision-making.
- Presented two key papers at the 3rd International Istanbul Scientific Research Congress focused on cloud resource optimization:
  - *"A Scalable Metaheuristic for the Winner Determination Problem in Large-Scale Cloud Auctions: An Adaptive Large Neighborhood Search (ALNS) Approach"*
  - *"Winner Determination Problem in Combinatorial Auction for Cloud Resource Allocation: Performance Analysis and Scalability Limits of the Integer Linear Programming (MILP) Model"*
- AI-driven game mechanics, autonomous intelligence pipelines, and high-performance cloud resource allocation.

Bachelor of Science, Computer Engineering
Bursa Technical University, Bursa, Turkey (Graduated with Honors)

- Ranked **3rd in department**, with a GPA placing in the top percentile.
- Core Team Member of the **Google Developer Student Club**, leading collaborative projects and technical peer-learning sessions.
- **Huawei Campus Ambassador**; organized workshops and hands-on events to promote advanced developer tools and ecosystem growth.

SKILLS

Languages: TypeScript, JavaScript (ES6+), PHP, Java, SQL.
Backend & Cloud Architecture: NestJS, Laravel, Node.js, Spring Boot.
Cloud & DevOps: AWS (Lambda, S3, API Gateway, DynamoDB, Athena), Google Cloud Platform (GCP), Docker, CI/CD Pipelines, Linux.
Frontend Ecosystem: React.js, Next.js, Vue.js, Nuxt.js, TailwindCSS.
Artificial Intelligence: Large Language Models (LLMs), Image Generation Pipelines, Multi-Agent Systems (MAS), Machine Learning.
Databases & Data Engineering: PostgreSQL, MySQL, MongoDB, Google BigQuery, Redis, Prisma ORM.
Engineering Principles: System Design, Microservices, Domain-Driven Design (DDD), External Payment Integrations, Event-Driven Architecture.
Academic & Research: Metaheuristics (ALNS), Integer Linear Programming (MILP), Cloud Resource Allocation.

CERTIFICATIONS & RECOGNITION

AWS Certified Developer – Associate | Issued Apr 2025
AWS Certified Solutions Architect – Associate | Issued Jan 2023
Amazon Web Services Community Builder | Selected in Mar 2022
