FATIH ES

Senior Software Engineer | Backend & Full Stack | Java, Spring Boot, Node.js, TypeScript, AWS
Ankara, Turkey | fatihesdev@gmail.com | +90 531 480 2676 | linkedin.com/in/fatihes | github.com/fatihes1 | fatihes.com

SUMMARY

Senior Software Engineer with 4+ years of experience designing, building and operating backend and full stack systems end to end. Backend development in Java (Spring Boot), Node.js/NestJS with TypeScript, and PHP/Laravel; frontends in React, Next.js and Vue.js; cloud-native and serverless deployments on Amazon Web Services (AWS) and Google Cloud Platform (GCP). Delivered RESTful APIs, microservices and event-driven systems for mobile game backends serving 100K+ concurrent users, real-time analytics pipelines, Direct-to-Consumer (D2C) payment integrations and high-traffic e-commerce platforms. AWS Certified (Developer, Solutions Architect – Associate).

TECHNICAL SKILLS

Languages: Java, TypeScript, JavaScript (ES6+), PHP, SQL, HTML5, CSS3
Backend: Spring Boot, Spring Data JPA, Node.js, NestJS, Express.js, Laravel, RESTful APIs, Event-Driven Architecture, Microservices, Distributed Systems
Frontend: React.js, Next.js, Vue.js, Nuxt.js, TailwindCSS, Responsive Design, Web Performance (Core Web Vitals)
Databases: PostgreSQL, MySQL, MongoDB, Redis, Amazon MemoryDB, DynamoDB, Google BigQuery, Prisma ORM
Cloud & DevOps: AWS (Lambda, API Gateway, S3, DynamoDB, Athena, CloudWatch), GCP (Pub/Sub, Cloud Functions, BigQuery), Serverless, Docker, CI/CD (GitHub Actions), Maven, Git, Linux
Testing & Quality: JUnit, Jest, Unit, Integration & End-to-End Testing, Code Review, Clean Code, SOLID
AI & LLM: LLM API Integration, Model Context Protocol (MCP), AI Agent Tooling, OpenAI API, Prompt Engineering, Image Generation Pipelines, AI-Assisted Development (Claude Code, GitHub Copilot, Cursor)
Practices: System Design, Domain-Driven Design (DDD), Payment Gateway Integration, Agile/Scrum

PROFESSIONAL EXPERIENCE

Software Developer – **Panteon Games**
Dec 2024 – Present · Ankara, Turkey

- Engineered a leaderboard service on Redis sorted sets for mobile games with 100K+ concurrent players, sustaining heavy score write traffic with low rank-query latency at peak traffic.
- Executed a zero-downtime, four-phase Redis to Amazon MemoryDB migration, replacing hash-tagged ({...}) keys that pinned 500 leaderboards (8.9M+ members) to one shard with entity-scoped keys spread evenly across shards, using dual writes, relocated Redlock locks and a parity test harness.
- Launched a Model Context Protocol (MCP) server giving LLM agents role-based read/write access to platform data, plus Player DNA, a behavioural segmentation engine that tags every active player daily.
- Eliminated silent attribution mismatches across PostgreSQL, BigQuery and marketing reports by designing configurable naming templates shared by the install (AppsFlyer) and ad-cost pipelines.
- Cut campaign setup across 6–7 ad networks from a full day to ~1 hour with a unified ad-management platform (Google Ads, Meta, TikTok, AppLovin, Unity Ads, Mintegral), local creative library and reusable campaign flows.
- Reduced API latency by ~30% and sustained 99.9%+ uptime by rebuilding legacy game control panels on AWS serverless (Lambda, API Gateway, Athena, DynamoDB) with NestJS/TypeScript.
- Lowered analytics infrastructure cost by ~80% with a serverless, event-driven pipeline on GCP (Pub/Sub, Cloud Functions, BigQuery), giving product teams near real-time player data.
- Delivered a Direct-to-Consumer (D2C) web store with Zotlo payment integration outside app-store billing, covering idempotent orders, refunds, reconciliation and server-side Meta Conversions API events.
- Implemented an LLM-based image generation pipeline for in-game assets with a caching layer that cut API cost.

Software Developer – **Moneo (Software Consultancy; clients: Kommunity.com, Karaca)**
Mar 2023 – Dec 2024 · Istanbul, Turkey

- Modernised Kommunity.com, a Meetup-style community platform in Turkey, into a modular, clean-code Node.js and React architecture with 87% test coverage, reducing regression bugs and making releases predictable.

- Shipped 2 Java/Spring Boot microservices (Spring Data JPA, PostgreSQL) for order and product data integrations at Karaca, one of Turkey's largest e-commerce retailers, with JUnit tests and Docker deployments.
- Decreased CPU utilisation by ~25% and API response time by ~20% during peak retail campaigns by optimising queries, caching (Redis) and payloads across NestJS, Laravel and Spring Boot services.
- Increased average session duration by ~30% by improving e-commerce frontend performance and checkout UX.
- Enabled Karaca's retail team to launch campaigns and manage product data without engineering support through an internal Laravel/React admin platform, shortening time-to-market for promotions.

Software Developer – **Nette Interactive**
Oct 2022 – Jan 2023 · Bursa, Turkey

- Automated CI/CD pipelines for Laravel web applications, replacing manual deployments with zero-downtime releases and cutting deployment time by ~40%.
- Crafted responsive client-facing interfaces with Vue.js and TailwindCSS for clients across diverse industries, from perfume and timber to curtains and hardware retail.

Software Developer (TÜBİTAK Scholarship) – **PyNar Open-Source Project**
Oct 2021 – Feb 2022 · Bursa, Turkey

- Co-developed the entire PyNar platform end to end, from PHP backend modules and RESTful APIs to a Vue.js/Bootstrap 5 web interface, as a TÜBİTAK-funded open-source R&D project.

EDUCATION

M.Sc., Computer Engineering – **Gazi University**
2025 – Present (in progress) · Ankara, Turkey

- Thesis: A Collaborative Multi-AI-Agent Model for Code Review in Software Development Processes and Its Performance Evaluation.
- Research focus: Multi-Agent Systems (MAS), Machine Learning, and cloud resource allocation.

B.Sc., Computer Engineering – **Bursa Technical University**
2018 – 2023 · Graduated with Honors, ranked 3rd in department · Bursa, Turkey

- Core Team Member, Google Developer Student Club; Huawei Campus Ambassador — ran technical sessions and workshops.

CERTIFICATIONS

• AWS Certified Developer – Associate — Amazon Web Services, Apr 2025
• AWS Certified Solutions Architect – Associate — Amazon Web Services, Jan 2023
• AWS Community Builder — Amazon Web Services, Mar 2022
• English Language Scholarship (4 levels, Berlitz) — Esas Holding & Sabancı
